email: j.panke@mds-ev.de

The findings of the international congress *sick leave in Europe* as well as condensed information about sick leave and RTW in different European countries can be found here:

www.mds-ev.de/3548.htm.

Feel free to find out more about managing sick leave.

We welcome you to our round table
„Struggling to manage sick leave in Europe“
at the EUMASS Congress on September the 24th.

Chairpersons are Joan E. Panke, Ph.D. (D) and
Jorma Järvisalo, D.Med.Sc. (FI).

Sick leave of salaried workers is an important economic and
public health problem in many European countries. A work
group of 20 experts from ten European countries introduced
an international exchange concerning this issue. The latest
milestone in this project was a meeting in Berlin in March 2010
where key questions were extracted.

At the round table the chairpersons will present the key
findings of the project group and start a discussion concerning
the following topics

- Certification and qualification of professionals
- Sick leave and return to work
- Cooperation among the professionals

We are looking forward to receiving your ideas and contribu-
tions to the discussion before the congress.
